

InfoCentre

The gateway to Edif ERA's expertise

Authoritative, reliable information improves the success rate in decision making, giving companies a sharper, more competitive edge.

Edif ERA's information professionals use quality assured sources to answer questions such as:

- What information can you find on...?
- Has anyone solved this problem before?
- What are the relevant standards on...?
- Who can supply...?
- What is the financial status of this company?
- Please supply this document...

Technical databases

Access to hundreds of databases including Inspec, Compendex, Metadex and IEEE Xplore enable us to search millions of journal articles, conference proceedings and books.

Standards and legislation

Automatic updating services, subject searching, equivalency and currency check for British and overseas standards and legislation.

Commercial databases

Database access to Dun & Bradstreet and Companies House provides company financial and credit information. We also have access to supplier details and market information.

Library

Internal databases facilitate document location, supply and loan.

About Edif ERA

Since its foundation in 1920, Edif ERA has evolved from its roots as a research association to become a centre of excellence in engineering technology with a strong brand and reputation, sitting at the forefront of specialist Asset Integrity service provision.

Edif ERA is committed to delivering professional services to our customers across all business sectors, assisting them in reducing technical and commercial risks, improving the operational performance of their assets and developing and enhancing the competitiveness of their products and systems.
