

Product compliance and market access updates 2020

Meet our speakers

An overview of regulatory requirements in the context of Brexit

Steve Brambley, Gambica
Chief Executive

Steve is the Chief Executive of GAMBICA, the Trade Association for Instrumentation, Control, Automation and Laboratory Technology in the UK. He leads GAMBICA in being a highly collaborative and influential organisation, engaging with a diverse range of stakeholders including UK and European governments, associations, institutions, industry and manufacturing, media and events companies, and standards bodies. He has over 14 years of trade association experience at GAMBICA with previous roles in public affairs and the industrial automation sector.

Steve also brings previous experience from the automotive industry, having worked for the Michelin Tyre Company and the Dana Corporation in management roles across manufacturing, quality, logistics and engineering. He has a degree in Mechanical Engineering from Loughborough University. He is passionate about the positive influence that technology can bring to UK industry, with a view to generating growth, protecting the climate, ensuring health and well-being and driving innovation in the UK.

Susanne Baker, tech UK
Associate Director, Climate, Environment and Sustainability

Susanne is Associate Director, Climate, Environment and Sustainability at techUK, the UK's business association for companies working in the digital economy. Before joining techUK, Susanne worked for seven years at EEF, the manufacturers' organisation (now MakeUK) and as a journalist for The ENDS Report. She chairs Material Focus, the new electrical recycling advocate, is a board member of the High Speed Sustainable Manufacturing Institute, and a fellow of the RSA (Royal Society of Arts, Manufactures and Commerce). She graduated from Kings College London with a degree in Environmental Science.

Liz Kimber, RINA

Principal Regulatory Consultant

Liz Kimber is a Principal Consultant within the Product Regulatory Compliance group of RINA Tech UK Ltd. She is a Chartered Mechanical Engineer with over 30 years' experience working in a broad range of sectors including; defence, energy, semiconductor, automotive, industrial manual handling and vacuum equipment. Liz has extensive experience assessing product regulatory compliance, for both EU and worldwide markets. She also has a practical knowledge of the application of technical standards, particularly in hazardous area applications.
