TRAINING DETAILS

This programme is only available online and has been adapted to the tighter scope of the API RP 580 'Body of Knowledge', incorporating more closely-worded examples and tests to fit the approach of this supplementary ICP examination format. It consists of eight sub-modules and mock examinations and takes approximately 40 - 50 hours to complete. Delegates require a copy of API RP 580 to participate in this programme. Please note that RINA does not book API examinations for the delegates: they must do this directly with API.

DID YOU KNOW?

RINA is an authorised global training provider for the American Society of Mechanical Engineers (ASME) and a market leader in the provision of ASME and API inspector training courses for pressure systems and mechanical plant.

Information on all RINA's all ASME and API inspector training courses and publications are available at:
https:// www.rina.org/en/technical-training

Our regular programme of CPD-certified courses covers a diverse range of areas, from lightning and earthing to rail and software safety. AccessERA subscribers receive a 10% discount on a range of RINA course prices at the time of booking, when the booking is made directly with the training team. Subscribers can also use their credits to book on certain courses.

RELATED COURSES

- API 570 - Pipework inspector
- API 510 - Pressure vessel inspector
- API 571 - Damage mechanisms
- API 653 - Storage tank inspector
